Re: AT&T New Telecommunication Tower at 340 Bald Hill Road, Brooktondale, NY

Taitem Engineering services were retained to review the application/documentation for the new proposed wireless telecommunications facility (Site No. 10141753).

- The facility is currently being proposed at the mentioned above address.
- Taitem received all pertinent documentation.
- The scope was focused on reviewing the documentation prepared and submitted by:
  - 1) AT&T Mobility Corp.
  - 2) Airosmith Development.
  - 3) GZA GeoEnvironmental of NY.
  - 4) TOWAIR.
  - 5) FCC reference documents.

We performed a peer review of the documents listed above.

In our professional opinion the documentation provided for the new proposed wireless telecommunication facility is compliance with local law #2 (1998), codes and standards.

Feel free to give me a call or e-mail if you have any questions.

Javier E. Rosa, PE
