Subject: Dollar Store

I am completely opposed to the Dollar Store proposal on Route 79. Upstate New York is a classic beautiful area with the history of receding glaciers creating the wonderful Finger Lakes. This natural formation of beauty is unique to this area. The historic beauty is only reinforced by the many favorite places of individuals during the Autumn foliage. The diverse higher educational opportunities lures talent from around the globe.

A Dollar Store would not increase employment opportunities with living wage payouts.

Now the obvious. These stores produce waste which is often left to decompose by nature.

The majority of products no limited to toys are mostly cheaply made in China. These products are also often made with dangerous chemicals imposing horrific health issues. And speaking of health, a 3rd party website stated that bad health coverage was available for those working at 30 hours a week. It was also stated that it's not easy to get 30 hours which is closely monitored.

Need I say more? Please don't allow this pollution to exist in our beautiful neighborhoods.
